SANTIOX

ROSEMARY NATURAL ANTIOXIDANT

Description:

Antioxidants extend the shelf-life of products by delaying the oxidation and degradation. The need for natural, clean-label, safe and sustainable antioxidants has pushed for the emergence of SANTIOX™.

Rosemary-based SANTIOX™ inhibits oxidation the natural way. SANTIOX™ is used to prolong the shelf-life over a wide range of application without impacting flavour, aroma and colour.

Sourcing & Manufacturing:

Rosemary leaves are sourced locally in Morocco and are the product of sustainable and ethical farming practices with the help of our network of cooperatives.

SANTIOX™ is extracted from the leaves of Rosemary Officinalis with an effective solvent extraction method to enhance oxidative activity of rosemary.

Value Drivers:

- All natural & Clean label
- Effective against oxidation and inhibits oxidative rancidity
- High heat stability
- Wide range of products suitable for varied applications
- Suitable for applications which are sensitive to aroma, colour and flavour
- Product of sustainable & ethical farming

Characteristics & Grades:

Product Name	Spec Range	Odour	Colour	Format	Solubility
SANTIOX P	1 – 40% Carnosic Acid	Fully Deodorized & Deflavored	Fully Decolourised	Powder	Oil Dispersible
SANTIOX L	1 – 12% Carnosic Acid	Fully Deodorized & Deflavored	Fully Decolourised	Liquid	Oil Soluble
